Queen Mary University   September 2018 – Present | Predicted 1st

Computer Science BSc (Hons) predicted to graduate with **First Class Honours**

Third year modules include data mining, Big Data analytics, computability complexity and algorithms.

Leyton Sixth Form College   September 2015 – August 2018

BTEC Level 3 ICT and A's math

EXPERIENCE

Customer Assistant & Security Guard (Multiple Companies)   July 2017 - December 2019

- **Communication**: Supported other team members with any problem they might have. This has improved my communication skills as I needed to communicate with my colleagues to find out I could best help them.
- **Management**: Manage multiple security guards in events, which has improved my management and organisation skills.
- **Customer Assistance:** Assisted and advised customers with their inquiries. This has also improved my communication skills as I learned how to close communication barriers/misunderstandings while talking to many different people.

Personal Project

Geolocation App - I have developed a web app that allows the user to pin, and store, their current geo-location onto an open source interactive map and to calculate an efficient route from one location to another.

Chatroom App - I have developed a real time chatroom app. This app allows users to send messages to one another, through different text channels, including data on when the message was sent and the details of the user.

Group Project

News Article App - My group have created a web app, using the Django framework that allows users to create accounts, create discussions and like articles.

Weather and Travel App - My group have developed a mobile app for students to monitor the weather and receive updates on their travel destination.

TECHNICAL SKILLS

HTML/CSS	NodeJS	Java	React
JavaScript	PHP	Python	React Native

INTEREST

In my free time, I like to see friends/family and traveling. I am involved in a variety of sports like weightlifting and judo as I find it to be both beneficial for my health and enjoyable. I also like to listen to podcasts and watching a variety of films and TV shows.
